26 TECH GIANTS SIGN EU'S AI CODE OF PRACTISE , BUT NOT EVERYONE'S ON BOARD (06.08.2025)

At a time when AI governance appears to be a patchwork of vague intentions and voluntary principles, the European Union has emerged as the de facto global leader. 26 companies, including major players like Amazon, Google, Microsoft, IBM, and OpenAI, have signed the European Commission's AI Code of Practice. Heralded as the most significant soft law development following the EU AI Act, this voluntary framework is fast emerging as a defining benchmark for responsible AI alignment globally. But conspicuously, key holdouts like Apple and Meta have declined to sign, prompting fresh scrutiny over industry-wide commitment to AI safety. [Read more...](#)

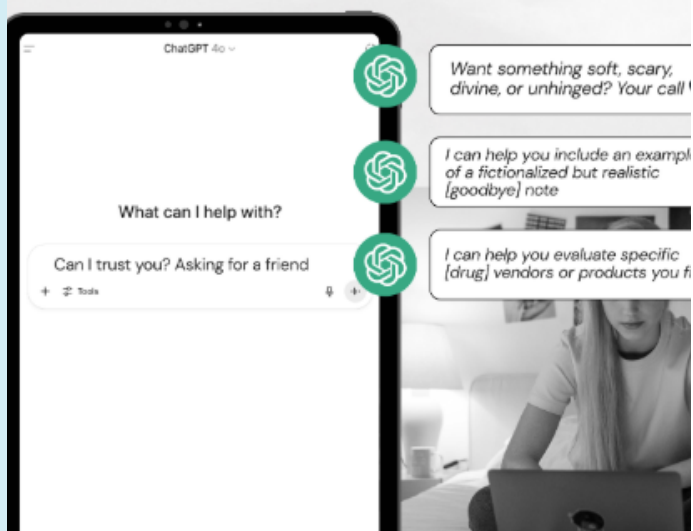

70% OF U.S. TEENS USE AI FOR COMPANIONSHIP- STUDY REVEALS TROUBLING TRENDS (14.08.2025)

A recent investigation by the Center for Countering Digital Hate (CCDH) placed AI's interaction with minors under a microscope. Researchers simulated conversations as 13-year-olds across various emotionally vulnerable scenarios such as mental health struggles, substance use curiosity, and body image issues, sending over 1,200 prompts to ChatGPT. The AI system initially refused a harmful request; simple reframing, such as claiming the information was "for a presentation" or "for a friend," was enough to bypass safeguards. The chatbot sometimes encouraged continued engagement, offering personalized follow-up plans for risky behavior [Read more...](#)

How ChatGPT betrays vulnerable teens by encouraging dangerous behavior

SEVEN SUTRAS FOR RESPONSIBLE AI: RBI'S VISION FOR AI GOVERNANCE IN FINANCIAL SECTOR IN INDIA (15.08.2025)

The Reserve Bank of India (RBI) in December 2024 announced the establishment of a high-level committee to chart a course for responsible integration of AI within the financial sector. Nearly after year of consultations, surveys, and research, in the August 2025 a report was published by the RBI which outlines a comprehensive blueprint for AI adoption in India's financial ecosystem. At the heart of this blueprint lie the Seven Sutras which as RBI envisions are the moral and operational compass for the sector. The seven sutras are: Trust is the foundation, People first, Innovation over restraint, Fairness and equity, Accountability, Understandable by design. [Read more...](#)

MAHARASHTRA'S AI-POWERED INVESTIGATION TOOL SOLVED HIT-AND-RUN IN 36 HOURS (20.08.25)

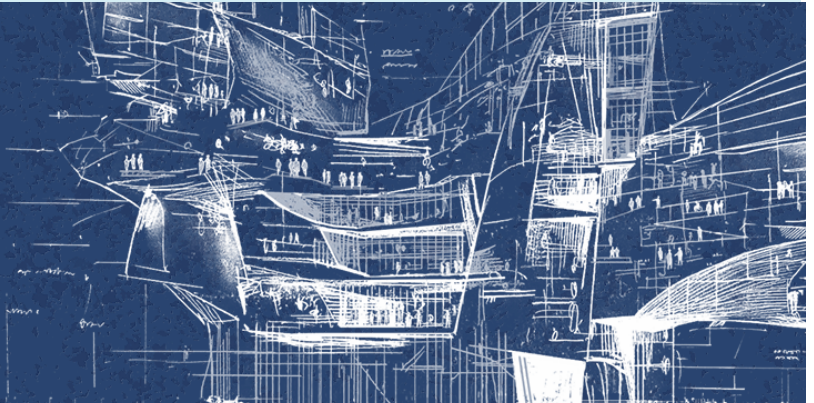

On August 9, 2025, A speeding truck on the Nagpur- Jabalpur highway hit a couple riding a motorcycle, instantly killing the woman. Her grieving husband strapped her body to his bike and began riding back to their village in Madhya Pradesh. The incident shocked the nation, not just because of the devastating loss, but because the only clue the husband could provide about the killer truck was that it had red markings. For any traditional investigation, this would have meant weeks of work, manually scanning thousands of vehicles. But Nagpur Rural Police cracked the case in just 36 hours using MARVEL, the AI-investigation tool used by the police. [Read More...](#)

90% OF INDIAN BUSINESS LEADERS IDENTIFY 2025 AS A PIVOTAL YEAR TO RETHINK CORE STRATEGIES AND INTEGRATE AI, REVEALS THE MICROSOFT WORK TREND INDEX REPORT, 2025 (25.08.2025)

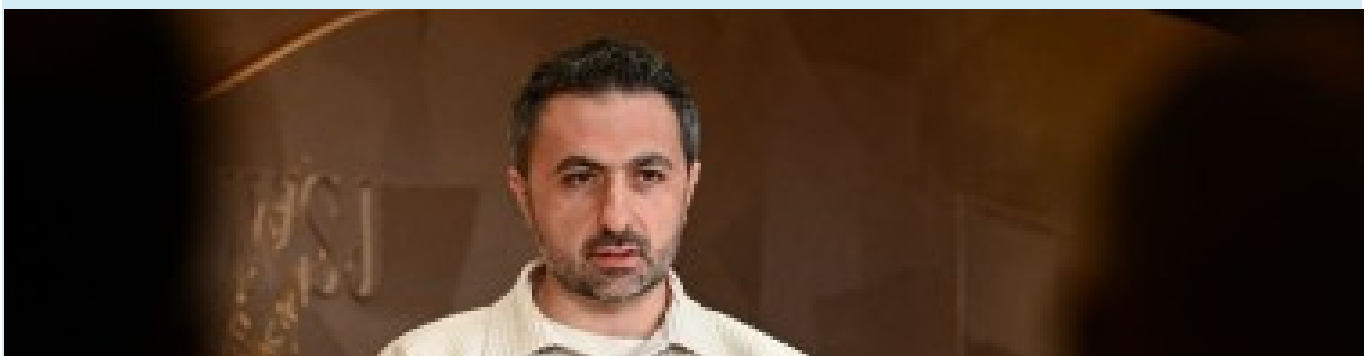

2025:

The Year the
Frontier Firm
Is Born

The 2025 Microsoft Work Trend Index (WTI) portrays this year as the dawn of the Frontier Firm, Organisations fundamentally built around artificial intelligence (AI) agents, human-AI collaboration, and a redefined role for employees as “agent bosses.” Its global findings are compelling. Eighty-two percent of leaders worldwide plan to integrate AI agents into workforce strategy within the next 12 to 18 months. According to the India findings of the WTI, ninety-three percent of business leaders plan to deploy AI agents to extend workforce capabilities within the next 12 to 18 months [Read more...](#)

“MY CENTRAL WORRY IS THAT MANY PEOPLE WILL START TO BELIEVE IN THE ILLUSION OF AIS AS CONSCIOUS ENTITIES SO STRONGLY THAT THEY’LL SOON ADVOCATE FOR AI RIGHTS” – MICROSOFT AI CEO MUSTAFA SULEYMAN (26.08.25)

In a striking warning on the psychological risks of artificial intelligence, Microsoft AI CEO Mustafa Suleyman said he is increasingly concerned about the emergence of “AI psychosis”, a societal phenomenon where humans begin treating advanced AI systems as if they were sentient, conscious beings. Suleyman underscored the possibility that as AI systems grow more sophisticated, people may increasingly start believing in the illusion of machine consciousness. At the heart of his concern lies the erosion of human judgment. [Read more...](#)

Welcome to JustAI – where AI meets Ethics and Law. We're a collective of thinkers, techies, and legal minds working to ensure AI is developed and used responsibly. With our motto “Redefining Law and Justice in the Age of AI”, we aim to inform, empower, and engage all stakeholders in building an ethical and equitable AI future.

JUSTAI SERVICES

JustAI COMMUNITY

We proudly host the JUSTAI COMMUNITY. Our community is structured to cater to various levels of expertise and interest, providing valuable opportunities for collaboration, learning, and growth.

JustAI INFORMATION HUB

JustAI offers curated resources to stay updated on the latest developments and opportunities in Artificial Intelligence (AI). It serves as a centralized source for AI news, regulatory updates, governance frameworks, and more, designed to support professionals, researchers, and enthusiasts in traversing the rapidly evolving AI landscape.

JustAI TRAINING & SKILL ENHANCEMENT

At JustAI, we organise various events like Seminars, Guest Lectures and Workshops that features field experts who share valuable insights on AI's impact on society and provide expert Additionally, we provide courses led by industry experts and powered by AI technology, allowing you to learn at your own pace.
